

3rd Annual
Six Sounds in Search of an Author Contest

This contest challenges students in grades 3-12 to create an original one-minute audio story that uses six sounds.

There is an easy-to-use tutorial, free software, and a library of examples. There is also a packet of supporting activities.

Nine prizes will be given in all—3 Elementary, 3 Middle School, and 3 for High School.

This activity can be done in a computer lab or in a one-computer classroom, and it correlates with the Common Core Standards and teaches a variety of 21st Century skills.
